Re: Response to minor amendment request for new Dike construction for the North End of the Primary Pond, Reilly Wendover, Bonneville, M/045/002, Tooele County, Utah

Dear Mr. Wadsworth:

On October 26, 1995, the Division received a telefaxed copy of a letter addressed to Mr. Doug Koza of the Bureau of Land Management (BLM), regarding a request for construction of a new dike on the Northern end of the Primary Pond. According to the requirements of R645-4-119 of the Minerals Rules, a permit amendment of a large mining operation requires Division approval, but does not require public notice. In the future, please also include the Division, when you notify the BLM or the School Institutional Trust Lands Administration (SITLA) of any changes that would affect your approved mining and/or reclamation plan. This includes any changes to your approved permit area or disturbed area boundaries.

On October 27, 1995, the Division received a copy of the letter from Alan Rabinoff regarding the BLM's approval of the new dike construction. The BLM also referenced the fact that there is no reclamation surety in place for this action. They are presently reviewing the surety amount for the entire Reilly Wendover operation affecting Federal leases. The Division is also reviewing the overall reclamation surety amount for the entire operation, in conjunction with the BLM and SILTA, and will contact you shortly regarding this matter.

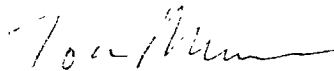

As you know, approval from SILTA is also required for any new dike construction affecting state mineral leased lands (i.e., section 32, T1S, R17W). Pending the appropriate approval from SILTA, the Division also grants approval for the construction of the new dike. Please provide the Division with the appropriate updated plates or maps to accurately reflect any changes to your operation in order to keep your mine plan properly updated. This information is also necessary for the Division to calculate an accurate reclamation bond.

Thank you for your attention to this matter. Please contact me or Tony Gallegos should you have questions regarding this request.

Sincerely,

Tom Munson
Reclamation Hydrologist
